

In the Specification:

Please substitute the following paragraphs for the corresponding paragraphs beginning at the indicated location in the specification as originally filed.

Page 4, line 16+:

The decoder 4 decodes the signals output from the program selection device 10, converts the signals into an MPEG (~~Motion~~ Moving Picture ~~Expert~~ Experts Group)-2 transport stream, divides the decoded data into voice data, image data, text data, and sends the divided data to the reproduction section 5. The reproduction section 5 includes a display device, and reproduces the voice data, image data, and text data sent from the decoder 4.
